Our network

The ECMC network works with pharma, biotech and medtech partners to conduct both commercial and academic early-phase oncology clinical trials across 18 adult and 11 paediatric centres in the UK.

Access our network to accelerate innovation in early-phase research and deliver real benefits for patients.

Thinking smarter, **delivering sooner**

Why work with us?

The ECMC network is uniquely positioned to deliver your early phase oncology clinical trials by offering:

- World-leading clinical, scientific and operational expertise in innovative, early-phase trials including first in human, first in class.
- Access to both adult and paediatric population, via centres integrated within the National Health Service and co-located universities.
- Engagement with experts and academics to explore and drive innovative clinical research and drug development opportunities.
- A supportive central team to advise on the most effective way to navigate the network.

Figures represent 2007-2019 data

ECMC Clinical Research Expertise

Precision medicine

- Comprehensive genomic profiling of tumour tissue and ctDNA
- Adopting and developing cutting-edge technologies and bioinformatics
- Biomarker stratified trials

Immunotherapy

- First in Human novel agent trials
- CAR-T
- Oncolytic virus
- Tumour-infiltrating lymphocytes

Combination therapy

- Design and delivery of complex trials including novel therapy, radiotherapy and technology
- Seamless transition of early- to late-phase research

Paediatrics

- 5 ITCC designated first-in-child centres
- A dedicated patient referral network
- Whole-genome and targeted panel sequencing
- Advanced imaging and biobanking

Supporting your path from lab to clinic

The ECMC Programme Office is your central team, facilitating:

- A single point of entry for site engagement, feasibility and study placement.
- A streamlined process utilising network-wide standard templates.
- Patient and Public Involvement, Investigator and Nurse clinical research training.
- Access to study delivery support through the National Institute for Health Research (NIHR).
- Opportunities for Industry and Academia to collaborate.

Enhancing patient referral

Experimental Cancer Trial Finder is our proprietary tool enabling patients to be matched and referred to trials across our ECMC Network.

Faster recruitment

Up-to-date information

Molecular stratification filter

Improved patient access
