

Research in the ICB

West Yorkshire Integrated Care System

ICB Research Leadership Working Group

- Challenges
 - As clinical services transition to commissioning at ICS level, this poses challenges for research delivery, in being able to engage with patients effectively as they move through pathways that cut across organisational boundaries. Research delivery must adapt to this reality.
 - IT and IG
- Opportunities
 - For place based research collaboratives to establish themselves as the model for 'best practice' in how to integrate research operations across an ICS
 - To rethink how we best use our research workforce using learning from the pandemic
 - Enabling better uptake of evidence

Place based examples from West Yorkshire

We are City of Research

Improving health within Bradford, Airedale and Craven through world-beating research
